The Problem We Solved

- There are many parties on campus but student often don't know where they should go.

- With this app, party hosts can post parties flyers and attendees can post their pictures from the event

- Bringing people together is our ultimate GOAL.

# Initial Prototype and Walkthrough

Sprint I:

- **Parse backend with login and signup was set up.**

- **NIce UI with gifs and logo(s) were added to the login signup page.**

Sprint II

- Bottom nav bar was implemented

- Different fragments were set up

- Home page and Profile Page was made to populate with different posts

- Encountered a bug with uploading pictures.

Sprint II

- Bottom nav bar was implemented

- Different fragments were set up

- Home page and Profile Page was made to populate with different posts

- Encountered a bug with uploading pictures.

Sprint III

- Compose fragment was set up.

- Users can now upload flyers and post pictures from gallery

- Users can also open camera to take pictures and post party photos with the description.

Demo with completed pages.

Next Steps

- Implement a like, comment, and follow feature.

- Implement a group feature to connect friends to each other.

- Sell party tickets from the app.

Thank you!

Let's Party and GO!
